

## SUNRISE, SUNSET - FIDLER ON THE ROOF

Men                    Is this the little girls I carried?  
                          Is this the little boy at play?

Women                I don't remember growing older  
                          When did they?

Men                    When did she get to be a beauty?  
                          When did he grow to be so tall?

Women                Wasn't it yesterday  
                          When they were small?

ALL                    Sunrise, sunset  
                          Sunrise, sunset  
                          Swiftly flow the days  
                          Seedlings turn overnight to sunflowers  
                          Blossoming even as we gaze

ALL                    Sunrise, sunset  
                          Sunrise, sunset  
                          Swiftly fly the years  
                          One season following another  
                          Laden with happiness and tears

Men                    Now is the little boy a bridegroom  
                          Now is the little girl a bride

Women                Under the canopy I see them  
                          Side by side

Men                    Place the gold ring around her finger  
                          Share the sweet wine and break the glass

Women                Soon the full circle will have come to pass

ALL                    Sunrise, sunset  
                          Sunrise, sunset  
                          Swiftly flow the days  
                          Seedlings turn overnight to sunflowers  
                          Blossoming even as we gaze

ALL                    Sunrise, sunset  
                          Sunrise, sunset  
                          Swiftly fly the years  
                          One season following another  
                          Laden with happiness and tears
